Induction Dynamics® Unveils New ID1-18 Tower Speaker at CEDIA Fall 2007

Experience Audio Perfection™ from this impressive, high-power loudspeaker

Overland Park, Kan., August 1, 2007 – Induction Dynamics®, an Overland Park, Kan.-based audio company, will unveil its latest addition to the ID series at CEDIA 2007.

The new, high-power ID1-18 tower speaker is an impressive 5' 5 ¾" (65.75") in height and provides very high power handling down to the lowest audible frequencies, while maintaining the exceptional sound quality for which Induction Dynamics is known. The new model is an addition to a line of speakers designed to satisfy even the most discriminating tastes.

The ID1-18 incorporates dual 18" subwoofers with a three-way speaker design for compact space requirements. With a 1.125" high-power soft dome tweeter, a 3" soft dome midrange, dual 8" woofers with Kevlar cones, and dual 18" high-excursion subwoofers with laminated cones, this loudspeaker will easily bring large listening spaces alive. The ID1-18 boasts many of Induction Dynamics' patented features, including exclusive S4X™ driver-control technology, Wide Angle™ phase alignment, and patented non-reflective grille frames.

Also available as companions to the ID1-18 are the new, high-power C1-8 center-channel speaker and the A2 600-watt subwoofer amplifier with patented excursion-limiter technology.

The IDs are available in standard rosewood gloss, maple satin, black satin and silver gloss and can also be customized to any buyer's wish. Grilles are available in 63 standard color options. Accessories include chrome-finished, adjustable carpet spikes.

Induction Dynamics will feature the ID1-18 at the CEDIA EXPO 2007, September 6-9, 2007, at the Colorado Convention Center. Visit booth #124 and sound room #9.

About Induction Dynamics

Induction Dynamics was founded in 1995 and is part of MSE Audio Group. Induction Dynamics' headquarters, manufacturing and distribution facilities are located in Overland Park, Kan.

Induction Dynamics designs and builds high-end loudspeakers with only the most select components and materials and utilizes numerous unique and proven technologies including exclusive, patented S4X™ driver-control technology, Wide Angle™ phase alignment, and patented grille frames, fastener designs, corner mounts, stud grabber in-wall systems, and excursion-limiter technology.

Induction Dynamics' extensive line of high-end loudspeakers and the SolidDrive® sound transducer are available through a nationwide network of authorized dealers. www.inductiondynamics.com. (866) 663-9770
